

i-32 V5 New

Pompa de caldura Inverter R32 monobloc.
Inverter R32 monoblock heat pump.

COP= A++

10 modele: cele mai compacte si performante de pe piata!

Ten models: the most compact and the best performing of the market!

VERSIIUNI

i-32V5

Reversible heat pump
Reversible heat pump with integrated defrosting kit

Tehnologia Inverter a compresoarelor alaturi de motoarele DC fara perii pentru ventilatoare impreuna cu puterea de modulare ridicata asigura o eficienta energetica totala maxima. Extinderea acestor tehnologii asupra tuturor componentelor asigura imbunatatirea EER si a COP si cresc substantial eficienta la sarcini partiale (ESEER si SCOP).

CARACTERISTICI CONSTRUCTIVE:

- Sistem de comanda proprietar cu reglaj pentru microcontroler, logica de control supraîncalzire cu supapa electronică de expansiune.
- Compressoare cu invertor DC: invertor DC rotativ R32.
- Ventilatoare: axiale cu motoare EC brushless fara perii.
- Condensator: circuit optimizat realizat din tevi de cupru și aripiere din aluminiu hidrofile.
- Evaporator: Schimbator de caldura din placi lipite realizat din otel inoxidabil AISI 304 cu cădere de presiune redusa pe partea de apă.
- Circuit frigorific: Circuitul este fabricat din tevi de cupru și include: controlul condensarii, valvă electronică de expansiune, vana de inversare, comutatoare pentru inalta si joasă presiune, separator și receptor de lichid, supape pentru întreținere și control, traductoare de presiune pentru presiune dublă aspiratie, presiune joasă și inalta.
- Sistem hidraulic integrat: pompă de circulație fără perii cu eficiență ridicată, vas de expansiune, fluxostat, aerisitoare, supapa de presiune (6 bari), manometru, supapa de apă pentru încărcare / descărcare instalatie.

LOGICA SI CONTROL:

- Toate unitățile pot funcționa în trei moduri diferite: încălzire, răcire și producție de apă caldă menajera, cu programe specifice care îmbunătățesc performanțele în toate condițiile, cu gestionarea curbei de temperatură.
- Le unità della serie V5 sono in grado di gestire valvole miscelatrici, deviatrici e circolatori lato secondario; sono inoltre in grado di controllare l'impianto solare termico, l'eventuale integrazione con fonti esterne di calore, e l'integrazione a sistemi esterni di Home/Building automation o di Domotica. Tutta la serie i-32/V5 è controllabile da remoto (accessorio HI-T) accedendo direttamente al sistema da qualsiasi browser (connessione ad una rete esistente con cavo ethernet).

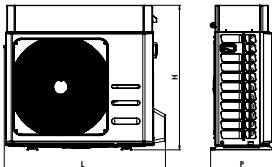

The inverter technology employment together with DC brushless motors ensures higher global energetic efficiency of equipment also thanks to high and effective modulating power. The employment extension to all components gives the COP and EER improvement and a substantial increase of partial loads efficiency.

BUILDING FEATURES:

- Customized control system with microcontroller regulation, overheating control logic with electronic expansion valve.
- DC inverter compressors: twin-rotary Dc Inverte.
- Ventilation: DC inverter with axial fan
- Source exchanger: optimized circuit with finned coil, copper pipes and hydrophilic aluminum fins.
- Users exchanger. A brazed stainless steel plate AISI 304 with reduced pressure drop on the water side.
- Refrigerant circuit: The circuit is made with copper pipes and includes: condensing control, electronic expansion valve, reversing valve, high/low pressure switch, separator and liquid receiver, valves for maintenance and control, double-inlet pressure, high and low pressure transducers.
- Integral hydraulic system: pump with high efficiency brushless circulator, expansion tank, flow switch, air valve, pressure relief valve (6 bar), pressure gauge, water valve for system charge/discharge.

LOGIC AND CONTROLS:

- All units can work in three different modes: heating, cooling and D.H.W., with specific programs that enhance the performance in all conditions, with possible management of the temperature curve.
- The V5 series units are able to handle mixing valves, diverter and circulatory secondary side; They are also able to control the solar thermal system, the eventual integration with external heat sources, and integration with external systems Home Building automation or Domotic. All i-32/V5 series is controllable remotely (accessory HI-T) directly accessing the system from any browser (connection to an existing network with ethernet cable).

 (4) Incalzire: temp. aer exterior 7°C b.s. 6°C b.u.; temp apa intrare/iesire 40/45°C
 (5) Racire: temp apa intrare/iesire 12/7°C
 (6) Racire: temp apa intrare/iesire 12/7°C; temp apa intrare/iesire 30/35°C
 (7) Date indicative ce pot varia. Pentru date exacte consultați eticheta tehnica a unității.
 (8) Calcul realizat pentru o scădere de temperatură de 10°C a sistemului și ciclu de degivrare de 6 minute.
 (9) Putere sonora: mod de incalzire conditii (3); valori determinate în conformitate cu normativul UNI EN ISO 9614-2, respectând normele de calcul EUROVENT.
 (10) Presiune sonora: valori calculate conform cu ISO 3744:2010 la 1 m.

(* impreuna cu functia Max Hz activata)

Operating conditions:

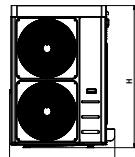

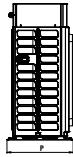

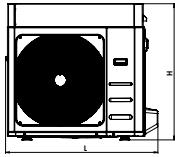

- (1) Cooling: Outdoor air temperature 35°C inlet/outlet water temperature 12/7°C
 (2) Cooling: Outdoor air temperature 35°C inlet/outlet water temperature 23/18°C
 (3) Heating: Outdoor air temperature 7°C DB 6°C WB; inlet/outlet water temperature 30/35°C
 (4) Heating: Outdoor air temperature 7°C DB 6°C WB; inlet/outlet temperature 40/45°C
 (5) Cooling: Water temperature inlet/outlet 12/7°C
 (6) Heating: average climate condition; $T_{inlet} = -7^{\circ}\text{C}$; water temperature inlet/outlet 30/35°C
 (*) The data are only indicative and subject to change. For the correct data, refer to the technical label stucked on the unit.
 (8) Calculated for a decrease of the water temperature of the plant with 10°C with a defrosting cycle of 6 minutes.
 (9) Sound power heating mode condition (3); the value is determined respecting the measurements taken in accordance with the regulations UNI EN ISO 9614-2, in compliant with the Eurovent certification.
 (10) Sound pressure level obtained with internal measurements made in accordance with ISO 3744, at 1 m distance.
 (*) activating the Max Hz function.
